EMERSON POLL: CLINTON LEADS SANDERS BY A WIDE MARGIN IN SOUTH CAROLINA, WITH STRONG SUPPORT FROM AFRICAN AMERICANS

Boston, MA – Heading into Saturday’s Democratic presidential primary in South Carolina, Hillary Clinton holds a commanding lead over Bernie Sanders, 60% to 37% among likely Democratic primary voters.

South Carolina is the first primary to test how the candidates will fare with a larger African American voting bloc, who comprise 55% of registered Democrats in the Palmetto State. Clinton appears poised to win this group with 71% of African Americans saying they will vote for her, compared to 25% for Sanders.

She also has a significant advantage among white voters (57% to 40%), women (62% to 33%), men (56% to 43%) and all age groups except young people 18-34, who favor Sanders 55% to 43%. In contrast, those ages 55-74 and 75 and above prefer the former Secretary of State by margins of 56 points and 59 points, respectively.

Likely Democratic primary voters have a very favorable view of both Sanders (75%) and Clinton (73%). However, of those with a positive view of Clinton, 75% plan to vote for her, whereas only 43% of those with a favorable opinion of Sanders say they will vote for him.

Both Clinton and Sanders voters expect Clinton to win. Ninety-one percent (91%) of Clinton supporters said they expect her to win and 67% of Sanders supporters said she would win as well, despite voting for Sanders.

Asked which issue was most important to them in this election, 30% of respondents cited the economy, 27% said race issues were their greatest concern, followed by dissatisfaction with government, chosen by 23%. This is in sharp contrast to the 40% of Republican primary voters in South Carolina who reported last week that defeating ISIS and terrorism was their number one issue.
