

1146 19<sup>th</sup> St., NW, Suite 200  
Washington, DC 20036  
(202) 463-7300

Interview dates: August 31- Sept 4, 2012  
Base: 1,447 registered voters (RV)  
Base: 600 RV Democrats, 610 RV Republicans, 177 RV Independents  
Base: 1,185 Likely Voters (LV), 195 Non-aligned RVs

**Ipsos Poll conducted for Reuters  
CONVENTIONS DAY 9 (9.4.12)**

*These are findings from an Ipsos poll conducted for Thomson Reuters from August 31 – Sept 4, 2012. For the survey, a sample of 1,447 American registered voters was interviewed online. The precision of the Reuters/Ipsos online polls is measured using a credibility interval. In this case, the poll has a credibility interval of plus or minus 2.9 percentage points for all respondents. For more information about credibility intervals, please see the appendix.*

*The data were weighted to the U.S. current population data by gender, age, education, and ethnicity. Statistical margins of error are not applicable to online polls. All sample surveys and polls may be subject to other sources of error, including, but not limited to coverage error and measurement error. Figures marked by an asterisk (\*) indicate a percentage value of greater than zero but less than one half of a per cent. Where figures do not sum to 100, this is due to the effects of rounding.*

*Non-aligned Registered Voters are defined as those individuals not indicating a candidate preference at the Presidential Voting Intention question (Q3 below).*

**POLITICAL AND ISSUES QUESTIONS**

Q1. Generally speaking, would you say things in this country are heading in the right direction, or are they off on the wrong track?

	<u>All Registered Voters (RV)</u>	<u>Democrats (RV)</u>	<u>Republicans (RV)</u>	<u>Independents (RV)</u>	<u>Non-aligned RVs</u>
Right direction	25%	45%	6%	19%	12%
Wrong track	62%	37%	89%	66%	64%
Don't know	13%	18%	5%	14%	24%

Q2. Generally speaking, would you say the following things are heading in the right direction, or are they off on the wrong track?

		<u>All Registered Voters (RV)</u>	<u>Democrats (RV)</u>	<u>Republicans (RV)</u>	<u>Independents (RV)</u>	<u>Non-aligned RVs</u>
The national economy	Right direction	17%	31%	5%	10%	6%
	Wrong track	75%	59%	92%	85%	81%
	Don't know	8%	10%	3%	6%	13%
Employment and jobs	Right direction	20%	34%	7%	15%	6%
	Wrong track	73%	57%	89%	80%	81%

Q3. If the 2012 Presidential Election were being held today and the candidates were [ROTATE] Barack Obama for president and Joe Biden for vice president, the Democrats, and [INSERT CANDIDATE BELOW AND ROTATE LIST] Mitt Romney for president and Paul Ryan for vice president, the Republicans [END ROTATE], for whom would you vote?

	All LIKELY Voters (LV)	All Registered Voters (RV)	Democrats (RV)	Republicans (RV)	Independents (RV)
Barack Obama for president and Joe Biden for vice president, the Democrats	45%	43%	79%	8%	35%
Mitt Romney for president and Paul Ryan for vice president, the Republicans	46%	43%	9%	86%	36%
Wouldn't vote	1%	3%	1%	2%	5%
None / Other	3%	4%	4%	1%	10%
Don't know / Refused	6%	8%	8%	4%	14%

Q4. In your opinion, which candidate for President has a better plan, policy or approach to each of the following?

8. Healthcare

	All Registered Voters (RV)	Democrats (RV)	Republicans (RV)	Independents (RV)	Non-aligned RVs
Barack Obama, Democrat	41%	73%	8%	37%	17%
Mitt Romney, Republican	32%	6%	68%	20%	7%
None	13%	8%	12%	23%	37%
Don't know	15%	13%	12%	20%	39%

b. Medicare

	All Registered Voters (RV)	Democrats (RV)	Republicans (RV)	Independents (RV)	Non-aligned RVs
Barack Obama, Democrat	38%	68%	9%	32%	22%
Mitt Romney, Republican	31%	6%	65%	23%	6%
None	13%	9%	11%	25%	35%
Don't know	17%	16%	15%	21%	37%

Q5. When you think about abortion, which of the following is closest to your personal opinion?

	All Registered Voters (RV)	Democrats (RV)	Republicans (RV)	Independents (RV)	Non-aligned RVs
Abortion should be illegal in all cases	16%	13%	23%	11%	11%
Abortion should be illegal in most cases	27%	17%	40%	22%	28%
Abortion should be legal in most cases	24%	28%	17%	35%	23%
Abortion should be legal in all cases	23%	34%	13%	22%	18%
Unsure	9%	8%	7%	10%	20%

Q6. As you may know, the US federal budget has a significant deficit. Here are the main expenses for the government. In your view, which of the following areas can we afford to cut back on? (Select all that apply)

	All Registered Voters (RV)	Democrats (RV)	Republicans (RV)	Independents (RV)	Non-aligned RVs
Social Security	11%	10%	12%	11%	12%
Medicare	11%	7%	16%	14%	6%
Defense & the Military	36%	48%	21%	42%	34%

Other	3%	3%	1%	4%	7%

### How to Calculate Bayesian Credibility Intervals

The calculation of credibility intervals assumes that  $Y$  has a binomial distribution conditioned on the parameter  $\theta$ , i.e.,  $Y|\theta \sim \text{Bin}(n, \theta)$ , where  $n$  is the size of our sample. In this setting,  $Y$  counts the number of “yes”, or “1”, observed in the sample, so that the sample mean ( $\bar{y}$ ) is a natural estimate of the true population proportion  $\theta$ . This model is often called the likelihood function, and it is a standard concept in both the Bayesian and the Classical framework. The Bayesian<sup>1</sup> statistics combines both the prior distribution and the likelihood function to create a posterior distribution. The posterior distribution represents our opinion about which are the plausible values for  $\theta$  adjusted after observing the sample data. In reality, the posterior distribution is one’s knowledge base updated using the latest survey information. For the prior and likelihood functions specified here, the posterior distribution is also a beta distribution ( $\pi(\theta/y) \sim \beta(y+a, n-y+b)$ ), but with updated hyper-parameters.

Our credibility interval for  $\vartheta$  is based on this posterior distribution. As mentioned above, these intervals represent our belief about which are the most plausible values for  $\vartheta$  given our updated knowledge base. There are different ways to calculate these intervals based on  $\pi(\theta/y)$ . Since we want only one measure of precision for all variables in the survey, analogous to what is done within the Classical framework, we will compute the largest possible credibility interval for any observed sample. The worst case occurs when we assume that  $a=1$  and  $b=1$  and  $y = n/2$ . Using a simple approximation of the posterior by the normal distribution, the 95% credibility interval is given by, approximately:

$$\bar{y} \pm \frac{1}{\sqrt{n}}$$

For this poll, the Bayesian Credibility Interval was adjusted using standard weighting design effect  $1+L=1.3$  to account for complex weighting<sup>2</sup>

Analysis Domain	Sample size	Credibility intervals
Registered voters (RV)	1,447	2.9
RV Democratic	600	4.6
RV Republican	610	4.5
RV Independent	195	8.0
Likely Voters	1,185	3.2
