## Brandon Whipple

Five Questions to Consider

1. Does Brandon Whipple share your values?
2. Will you have representation in Topeka if he is elected.
3. How much is enough for school funding
4. Is he lying when he says he will stop property tax increases.

**Lets** start with **Share your values** At a recent neighborhood association meeting in his opening remarks he said "I'm not one of those strong Democrats, I married into a Republican Family and have learned to compromise" I think you can draw your own conclusion.

**NO** Representation! If elected Brandon will be a freshman in the minority party it will be years before he will be able to chair any committees.

He won't even have a seat at the table

**Enough** Currently Kansans are spending \$13,070 per student per in Wichita for public education. Brandon claims schools are underfunded, even though private education costs about \$4400 per student. His answer when asked how much was enough was

"What the independent findings were" Which is \$17,000 per student He has lied to you about school funding.

**Tax Increases** If the school lawsuit is successful it will trigger a 55% increase in property taxes. Brandon supports the school lawsuit.

Does Brandon really understand what is **important to your family**

Can someone with **no children** really understand your family's needs?

Can someone that **doesn't pay property taxes** (his name is not on the title of the house he lives in.) understand the burden they put on your family.

Can someone that has never worked in the private sector, that only works 9 months out of the year and gets paid for 12. That at 55 will have a **\$1 million pension plus \$1000's per month** guaranteed by you the taxpayer for the rest of his life really understand the working man.

Can someone that has never owned a business, or written payroll checks, never sweated blood to make it work, really understand your business?
